Kevin Keith, Director

March 11, 2011

Dear Consultant:

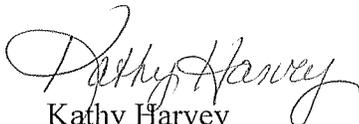

The Missouri Highways and Transportation Commission is requesting the services of a consulting engineering firm, pending STIP approval, to perform the described professional services for the projects included on the attached list.

If your firm would like to be considered for these consulting services, you may express your interest by responding to the appropriate office, which is indicated on the attachments. Limit your letter of interest to no more than two pages. This letter should include a statement to indicate why your firm is interested in the project. It should also include any other information which might help us in the selection process, such as the persons or team you would assign to each project, the backgrounds of those individuals, and other projects your company has recently completed or are now active. We will utilize the consultant information already on file so we will not need a lengthy submittal of other general company information.

DBE firms must be certified by the Missouri Department of Transportation in order to be counted as participation towards an established DBE Goal. We encourage DBE firms to submit letters of interest as prime consultants for any projects they feel can be managed by their firm.

We request all letters be received by 3:00 pm, March 24, 2011 at the appropriate office.

Sincerely,

Kathy Harvey
State Design Engineer

Email responses are encouraged

Lincoln County, Route 61	
Job No:	J3P2213
Location:	About 2 miles N of Troy
Proposed Improvement:	Replace existing steel bridges A2601 over the Cuivre River.
Length:	The existing 11 span bridges are a total of 696 feet long. New bridges may need to be longer to minimize flooding on Route 61.
Approximate Construction Cost:	\$7 to \$10 million
DBE Goal	0 %
Letting Date:	Future
Consultant Services Required:	<p>Bridge Survey will be provided by District 3. Some minimal surveying may be required to supplement this surveying.</p> <p>Bridge: Hydraulic Study to determine what length of bridge is required at this site, and what grade raise is needed to minimize flooding. Also needed are recommendations for stream stabilizations.</p>
Other Comments:	<p>Completed hydraulic study and stream stabilization recommendations by August 1, 2011.</p> <p>Consultant will need to coordinate directly with District 3 regarding surveying and flood history of bridge.</p> <p>No interviews – due to the short timeframe it is anticipated that selection will be made within two weeks. Goal is to have the project under contract with a consultant quickly.</p>
