Bridge Replacement

**Closure Duration:** 29 days

**Construction to Begin:** April 2011

**Bridge Location:**

Route O, Pine Branch

**Work to be completed:**

Bridge Replacement

**Closure Duration:** 43 days

**Construction to Begin:** May 2011

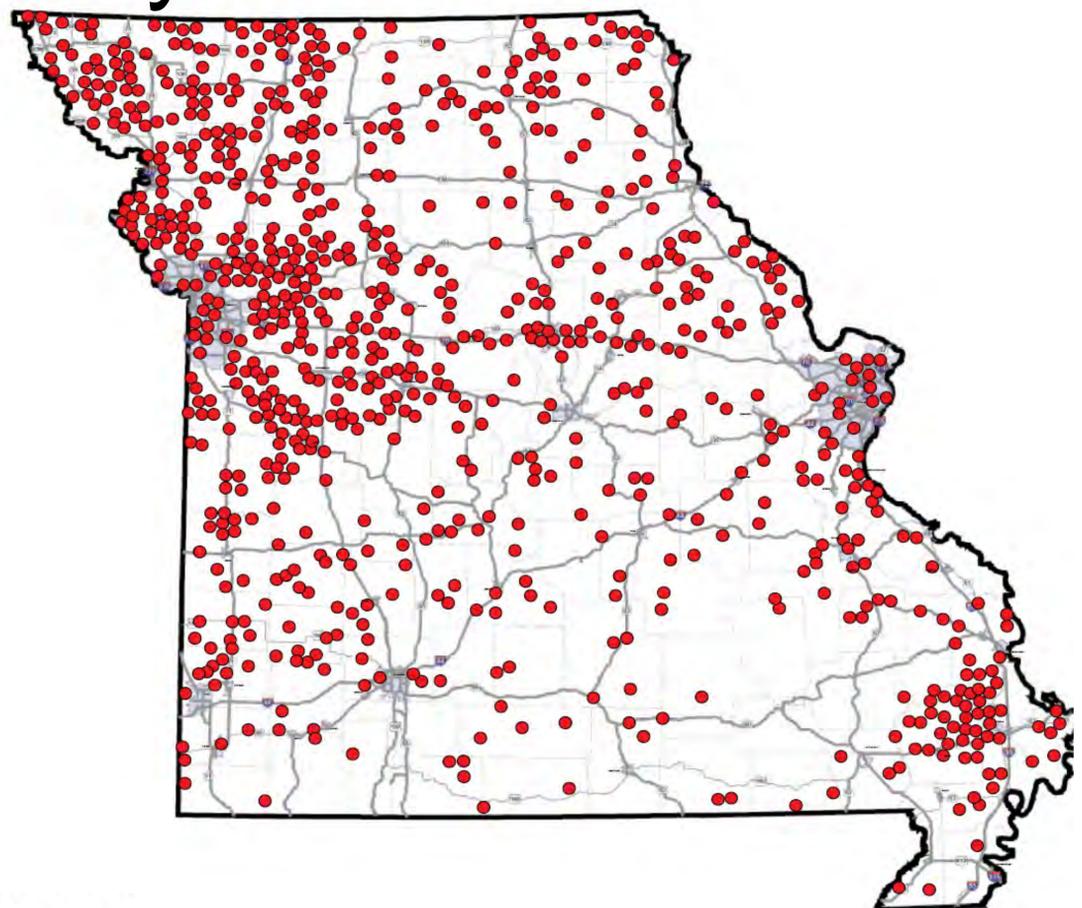

# 800 Better Bridges

## What is the Safe & Sound Bridge Program?

The Safe & Sound Bridge Program is a partnership between MoDOT and a team of engineering and construction companies.

Working together, the Safe & Sound team will replace or rehabilitate one or more bridges in every county in the state.

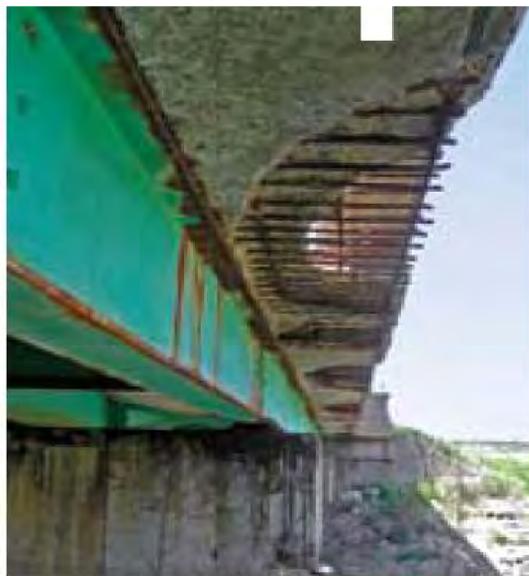

# 800 Better Bridges

## What will Safe & Sound do?

- Repair or replace more than **802** state bridges that are in poor or serious condition;
- Finish replacement and rehabilitation by the end of 2013;
- Complete the work within a specific, fixed budget; and
- Close most bridges to speed construction and keep costs down.

# 800 Better Bridges

## How will MoDOT pay for Safe & Sound?

MoDOT will issue bonds to pay for Safe & Sound, with annual payments of about \$50 million per year. That price tag fits within MoDOT's budget.

- MoDOT will pay for the work through a commitment of future federal bridge funds;
- MoDOT will substantially upgrade the state's bridge system with no tax increase or no new taxes.

# Better Bridges

## What should we expect when construction begins locally?

- Signs are posted to alert drivers of bridges to be improved.
- Other signs posted 30 days prior to start of construction.
- Many closed bridges will have a detour marked on other state roads.
- Some bridges that carry low volumes of local traffic will be marked “ROAD CLOSED” with detour shown on Web site.
