

Safe & Sound Bridges In Mid-Missouri

The following shows the location of mid-Missouri bridges included in the Safe & Sound program.

For details, log onto
www.modot.org/safeandsound.

Construction Status

Go to www.modot.org/safeandsound to learn more about the Safe & Sound program. An interactive map showing the status of bridge improvements is available online. To talk with a member of our staff, call 1-888-ASK-MoDOT (275-6636). You can also sign up for MoDOT's e-update system (www.modot.org) and receive project updates customized to your preference — by specific county or region of the state.

Signs of Improvement

Safe & Sound signs are posted on all bridges included in the program to notify the public of bridges scheduled for improvement. Prior to the start of construction, signs displaying a brief description of the work as well as the completion season and year will be installed. Check the web site or call MoDOT to get the latest projected start dates for each bridge.

Salem High School Cafeteria, 1400 Tiger Pride Drive, Salem, Mo.
Dec. 7, 2011, 4 p.m. to 6 p.m.

Frequently Asked Questions

1. What is the Safe & Sound Bridge Improvement Program?

Safe & Sound will replace or rehabilitate 802 of MoDOT's most worn-out bridges in five years — by the end of 2013. Bridge improvements began in early 2009 and over 650 are already completed. MoDOT is completing 248 bridges using innovative contracting methods. The other 554 bridges are part of a \$487 million design/build contract with KTU Constructors. Bonds will be sold to pay for the bridge work, with annual payments of about \$50 million. MoDOT will use one-third of the federal bridge placement funds it receives annually to make payments.

2. How many bridges are included in the Safe & Sound program in the central Missouri area?

Eighty-seven bridges in the central Missouri area are included in the program. Tonight's meeting will focus on three bridges in Dent County that are scheduled for construction in 2012.

Route 32, Spring Creek Bridge, located just east of Salem

Route H, Holt Creek Bridge, located one mile west of Route DD

Route NN, Dry Fork Bridge, located about three miles west of Route F

3. What type of improvements are planned for the bridges featured at tonight's meeting?

All three bridges will be completely replaced. Some temporary easements may be needed at some locations.

4. When will work take place?

Work on the Route 32 bridge is scheduled to start in June 2012 and will last for approximately 89 days. Work on Route H is scheduled to begin in April 2012 and take about 45 days to complete. Work on Route NN is scheduled for late February 2012, and will take approximately 45 days. Because construction crews across the state are moving from one bridge to another at an accelerated pace, construction schedules can change. Motorists should be aware that start dates can fluctuate as the contractor progresses from bridge to bridge. Check the Web site or call to get the latest projected start dates for each bridge. You can also sign up for MoDOT's eupdate system (www.modot.org) and receive project updates customized to your preference — by county or region of the state.

5. How will traffic be handled during construction?

To speed construction and save money, the Route H and Route NN bridges will close completely during construction and motorists will need to find alternate routes around the work area. A temporary bypass will route motorists around the construction area on Route 32.

6. Who do I contact for more information?

The public is always encouraged to contact us toll free at 1-888-ASK-MoDOT (275-6636) with questions and comments. Information about Safe & Sound and a complete listing of bridges included in the program can be found at www.modot.org/safeandsound.

Dent County, Route 32, Spring Creek Bridge

Bridge Replacement. Construction duration is approximately 89 days.
A temporary bypass will route motorists around the construction area on Route 32.
